

## Ammanuel Church COVID 19 Updates Jan 28<sup>th</sup>, 2022

### Health Department

**Since then, the average daily cases over the past week have dropped by more than 75% GOOD NEWS**

Philadelphia health officials say the winter COVID-19 surge has reached its peak between **Jan. 9 and 12**, but people must still take precautions as the omicron variant continues to spread. Cases in Philadelphia are down nearly **75% since two weeks ago**, averaging now at about **996 cases a day**, and **hospitalizations are down 30% since last week**. All of these are good signs and make us hopeful. But all of this depends on us. **Masks, vaccines, and boosters, isolating, and quarantining when exposed and avoiding indoor gatherings, when possible, still matter**

Omicron still makes up **98% of cases in Philadelphia** and of the roughly **1 million city residents over 5 who are fully vaccinated**, only a quarter of them have received booster shots.

“It’s highly contagious, so our ability to maintain this drop in case count depends on what people do stressing the need to get boosted said the health commissioner

- Residents can text COVIDPHL to 888-777 to get updates sent to their phones.

In the last two weeks, **10.1 percent (28.8 percent- two weeks ago) of COVID-19 tests** in Philadelphia have come back **positive**.

Philadelphia is averaging **921 per day (3,301 new cases -last two weeks)** of COVID-19 per day over the last two weeks

**79** percent of Philadelphia adults are fully vaccinated, and more than **95 percent** of Philadelphia adults have received at least one dose of COVID-19 vaccine.

**5-11 years** vaccinated are **45.2%** (**33.1% last week**) in Philadelphia

**904 (1,621-last two week)** are hospitalized and **103 (126-last two weeks)** use ventilators in Philadelphia

### **Booster shots**

**Anyone 12 or older can get a booster dose after they've completed their COVID vaccine series.**

To get a booster, you'll need to show your vaccine card or a photo of your vaccine card. If you've lost your card, **you can request a replacement.**

**Please vaccinate (five years and above)**

**Religious Institute Guidance (posted church website)**

### **Philadelphia mask mandate**

Philadelphia's **mask mandate went into effect on August 12, 2021** to combat the COVID-19 emergency in Philadelphia.

- **Masks will be required indoors at all Philadelphia businesses, institutions, and event venues.**
- **Businesses, institutions, and event venues that require vaccination for all employees and patrons are exempted from having a mask requirement.**
- **Businesses, institutions, and event venues that do not require everyone who enters to be vaccinated, must require everyone on site to wear a mask except only:**
  - **When actively eating and drinking while seated or at a standing table of no more than four people.**
  - **Anyone who is not seated or at a table may not eat and/or drink.**
- **If any individual is unvaccinated, everyone in the institution must be masked when the masked, unvaccinated person is present, no matter the reason the person is unvaccinated.**

6 ft distances, mask, wash hand, if sick stay home.

**Clean all surfaces; Communicate with congregates**

## Hospitalized & Death unvaccinated people 99.2 % and 99.0%, respectfully

**Omicron Subvariant:** The BA.2 subvariant of the Omicron coronavirus variant, which is dominant in Denmark, appears more contagious than the more common BA.1 sub-lineage, Danish Health Minister Magnus Heunicke said on Wednesday in a national address.

"There is no evidence that the BA.2 variant causes more disease, but it must be more contagious," Heunicke told a news conference.

The BA.1 lineage currently accounts for 98% of all cases globally but in Denmark has been pushed aside by BA.2, which became the dominant strain in the second week of January.
