

Ammanuel Church COVID 19 Updates July 22th, 2022

Health Department

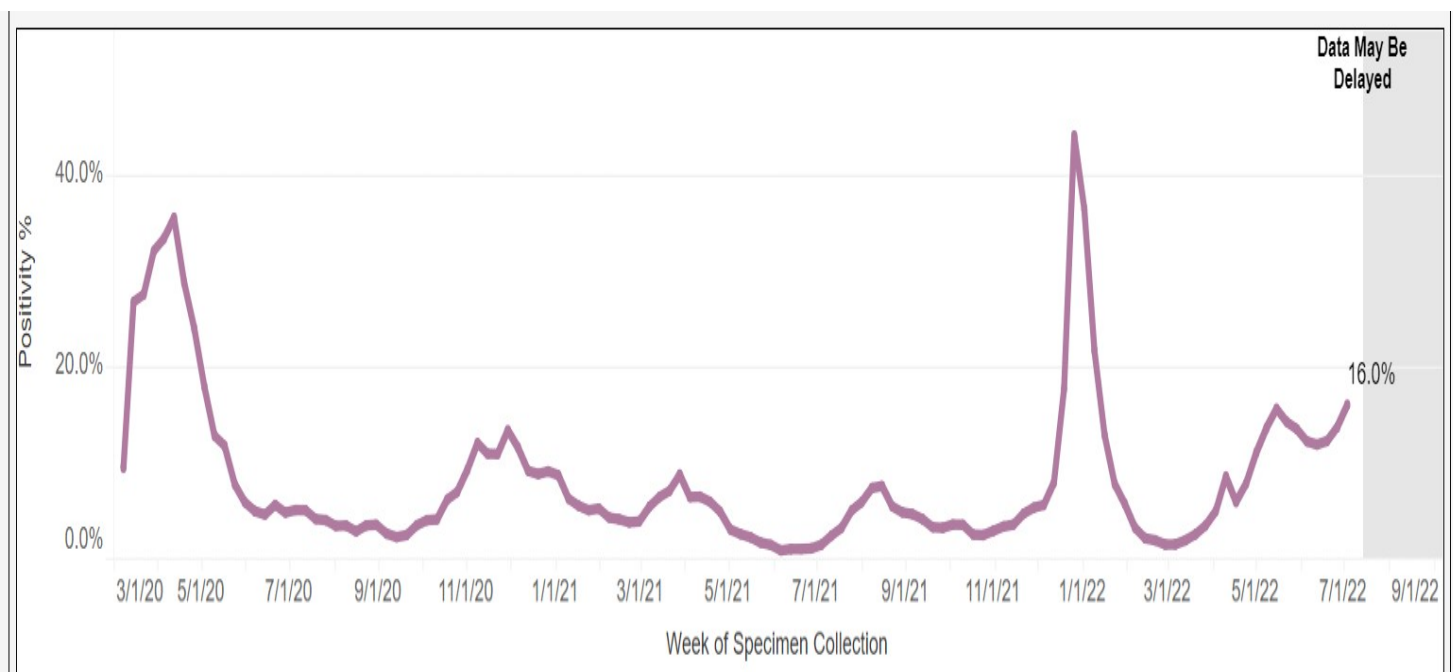

Currently, 78.2 percent of Philadelphia adults are fully vaccinated, and 95 percent of Philadelphia adults have received at least one dose of COVID-19 vaccine.

In the last two weeks, **14.6 percent** of COVID-19 tests in Philadelphia have come back **positive**. Thus far during the pandemic, 306,731 Philadelphians have been diagnosed with COVID-19, and 5,092 have succumbed to the virus. Philadelphia is **averaging 320 new cases of COVID-19 per day over the last two weeks**.

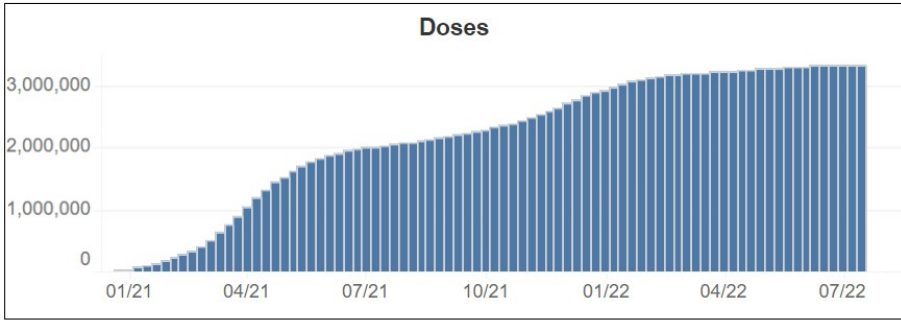

Everyone 6 months and older is now eligible to be vaccinated against COVID-19.

All require the new Booster specifically those who are above 50 years old and preexisting conditions

Philadelphia COVID and Vaccine Status shown the two graphs below

Cumulative Counts by Week

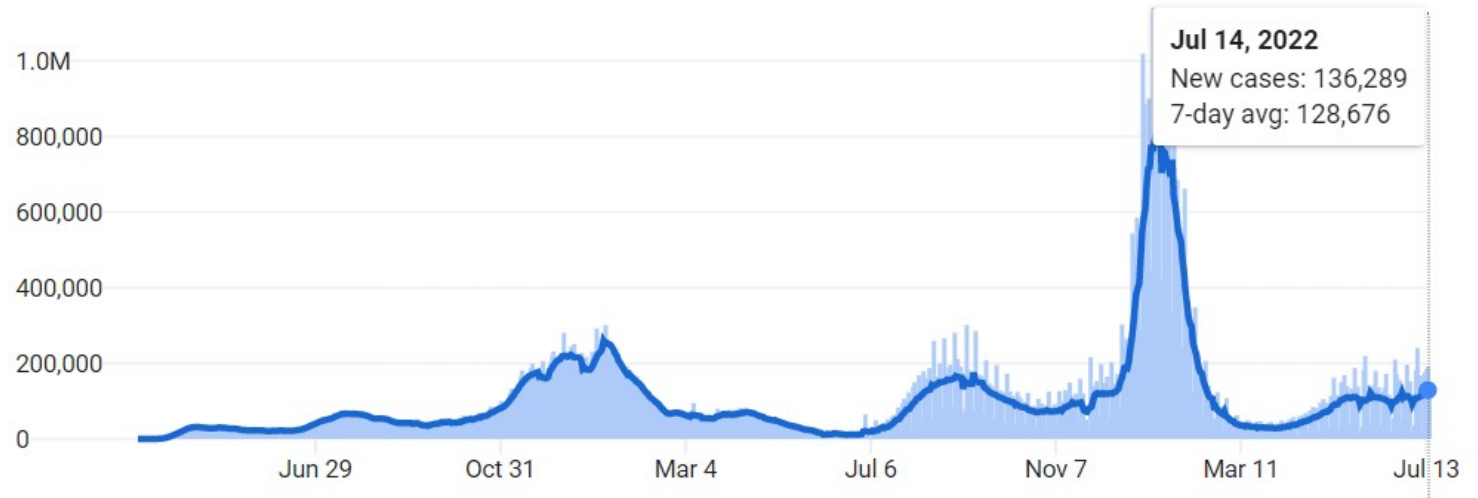

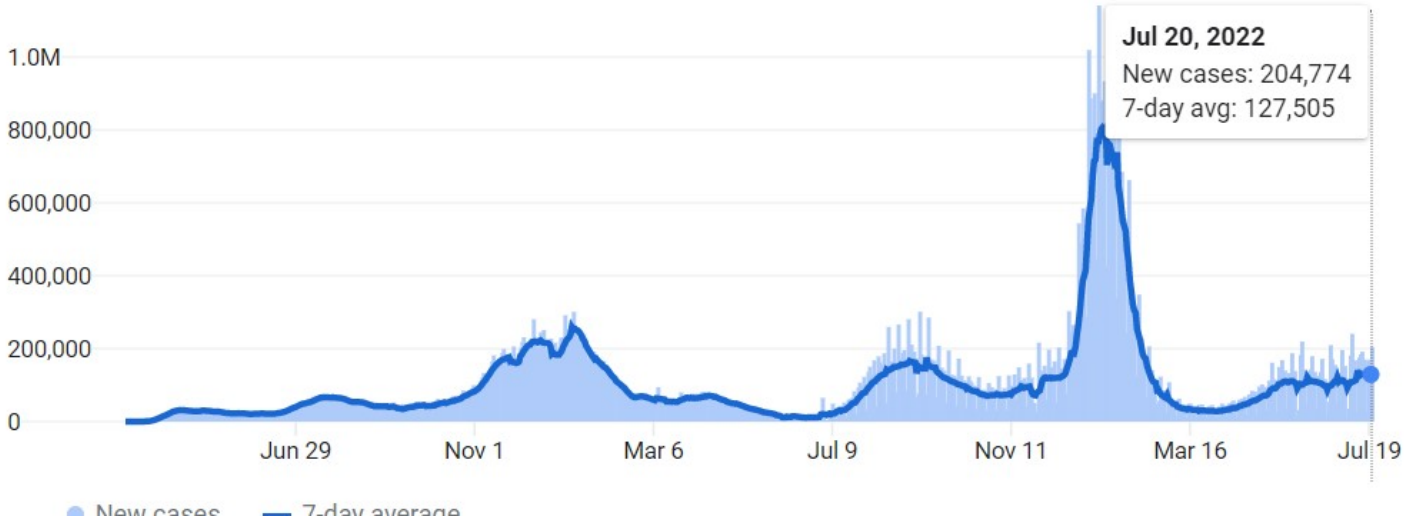

Data may be delayed over most recent weeks.

Doses Administered

Total by Manufacturer	
Pfizer	2,098,326
Moderna	1,150,086
Johnson & Johnson	82,772
Grand Total	3,331,184

USA COVID 19 Status

Monkeypox

There are at least 64 monkeypox cases in Pennsylvania, with 33 in Philadelphia; 45 probable and confirmed cases in New Jersey; and one case in Delaware.

The is latest number of vaccines in the region:

- **Pennsylvania: 3,200 doses**
- **Philadelphia: 2625 doses**
- **New Jersey: 5400 doses**
- **Delaware: 413 doses**

If you think you've been exposed to monkeypox, isolate at home and call your doctor.

The virus is spreading through prolonged skin-to-skin contact, and anyone can get it.

Monkeypox starts with a lot of the classic virus symptoms: tiredness, pain, a headache, a fever. But then the classic ones are these pox marks, these lesions, they can start off looking just like a pimple.
